Introduction

Cranborne Stone

At Cranborne Stone we have been supporting property professionals with their building projects for over 30 years, utilising our extensive knowledge and skill in supply of cast stone architectural features.

Our team is made up of approachable estimators, creative designers, skilled craftsmen and a diligent delivery team as well as the essential back office support that ensures each project runs smoothly.

We are proud of our reputation for being easy to deal with and for having a flexible approach enabling us to match the individual demands of each project and look forward to demonstrating these to you.

Guides are available for each of our products.

These will help you choose the correct components and assist you in installation.

Our range of colours have been developed to reflect the regional variations of true stone.

Bath Yellow

Cotswold

Shaftesbury Green

York

Portland White

Italian Terracotta

Developing a Property with Cranborne Stone

High quality cast stone features will enhance any property project from the restoration of a historic building to a contemporary style new build.

With Cranborne Stone you will not only benefit from the supply of a wide range of distinctive architectural features but also clear and responsive project support.

- **Wide range of styles & features**
- **Bespoke design service**
- **Choice of regional stone colours**
- **Colour matching service to blend the new with existing**
- **Named support for each project**
- **Interpretation of initial drawings**
- **Sound advice on managing cost whilst maintaining aesthetic consistency**
- **Provision of detailed drawings**
- **Restoration capability**
- **Fitting service**
- **Clear to read quotations**
- **Agreed delivery dates**
- **Supporting drawings in a range of formats including AutoCAD, PDF, and Sketchup**

This catalogue is designed to provide you with all the technical specification of our architectural range. If you would like to know more or would like assistance with a specific project please call or email one of our knowledgeable team who will be pleased to help.

Example A Portico

We have many configurations of Porticos, both standard and bespoke, to help you choose we have designed three examples.

The Example A Portico uses Traditional Tuscan Style CM20 Columns, A010-300 Plain Architrave, and R010 Decorative Cornice.

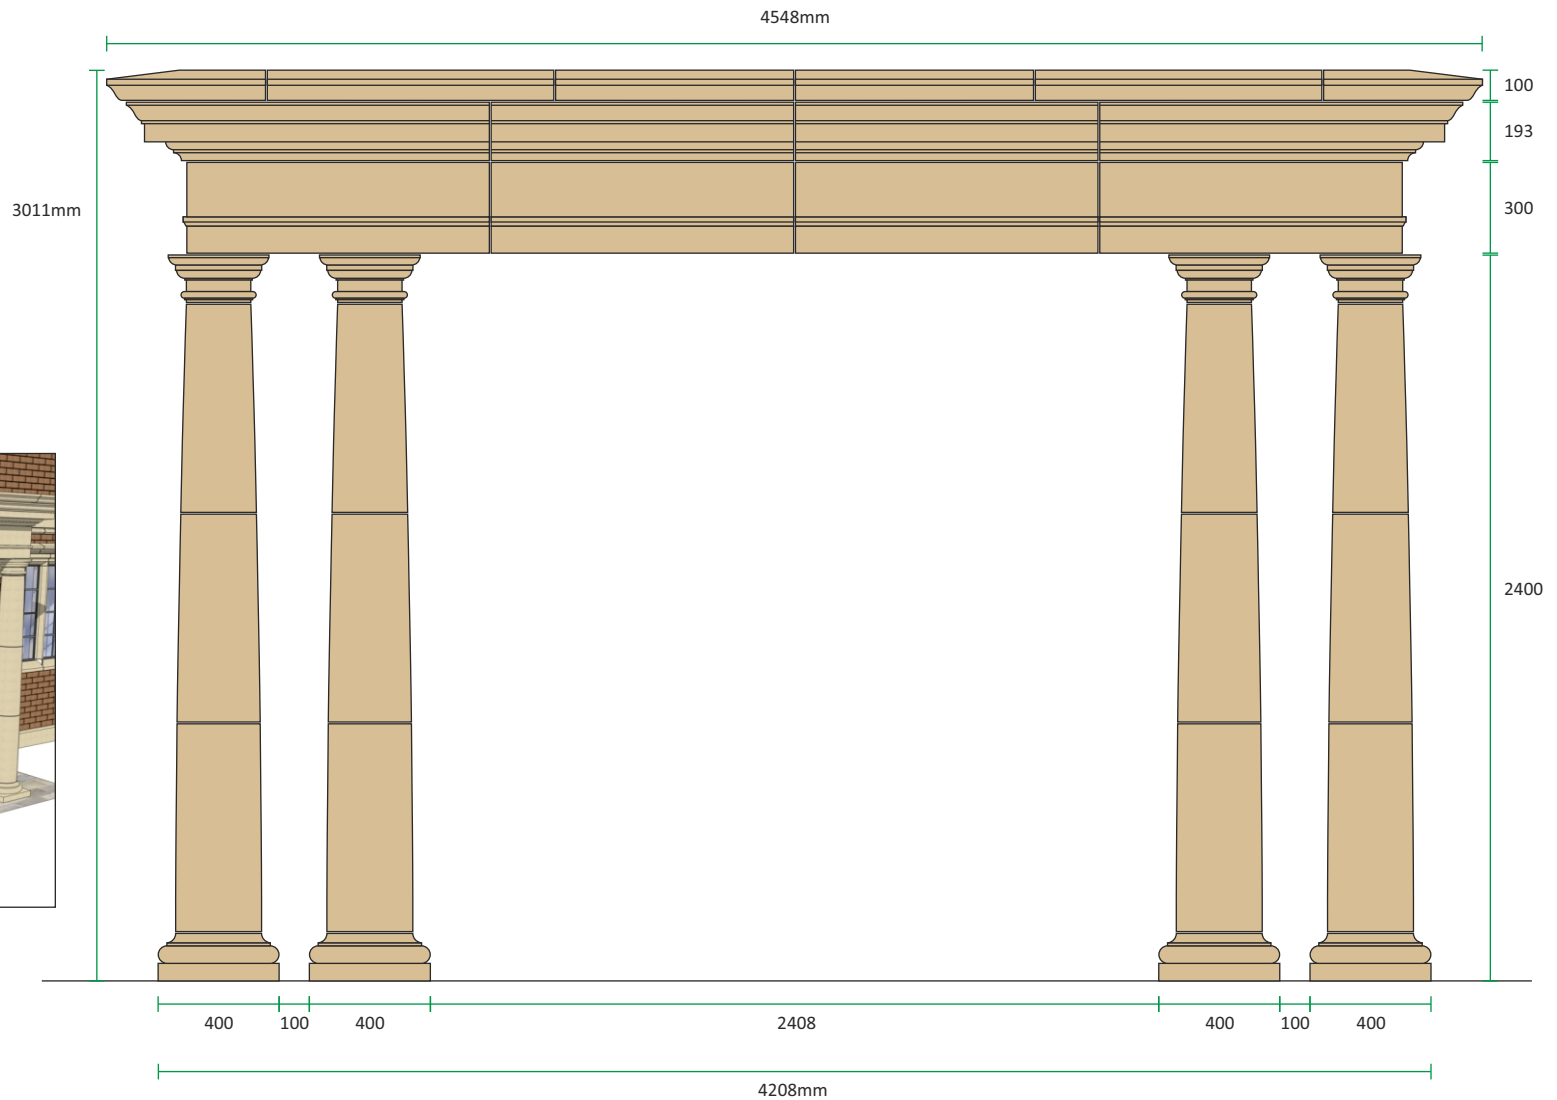

We recommend that the installation should be carried out by a competent builder or qualified Stone Installer.

Some sections may require cutting to suit your installation, full details and an easy to follow guide is available upon request.

All joints shown 6mm

Example B Portico

This example shows how double columns can create an impressive look to any facade.

This example has a maximum projection from the building of 1531mm

The Example B Portico uses Traditional Tuscan Style CM30 Columns, A030 Decorative Architrave, our R010 Decorative Cornice, and R015 Weathered Cornice.

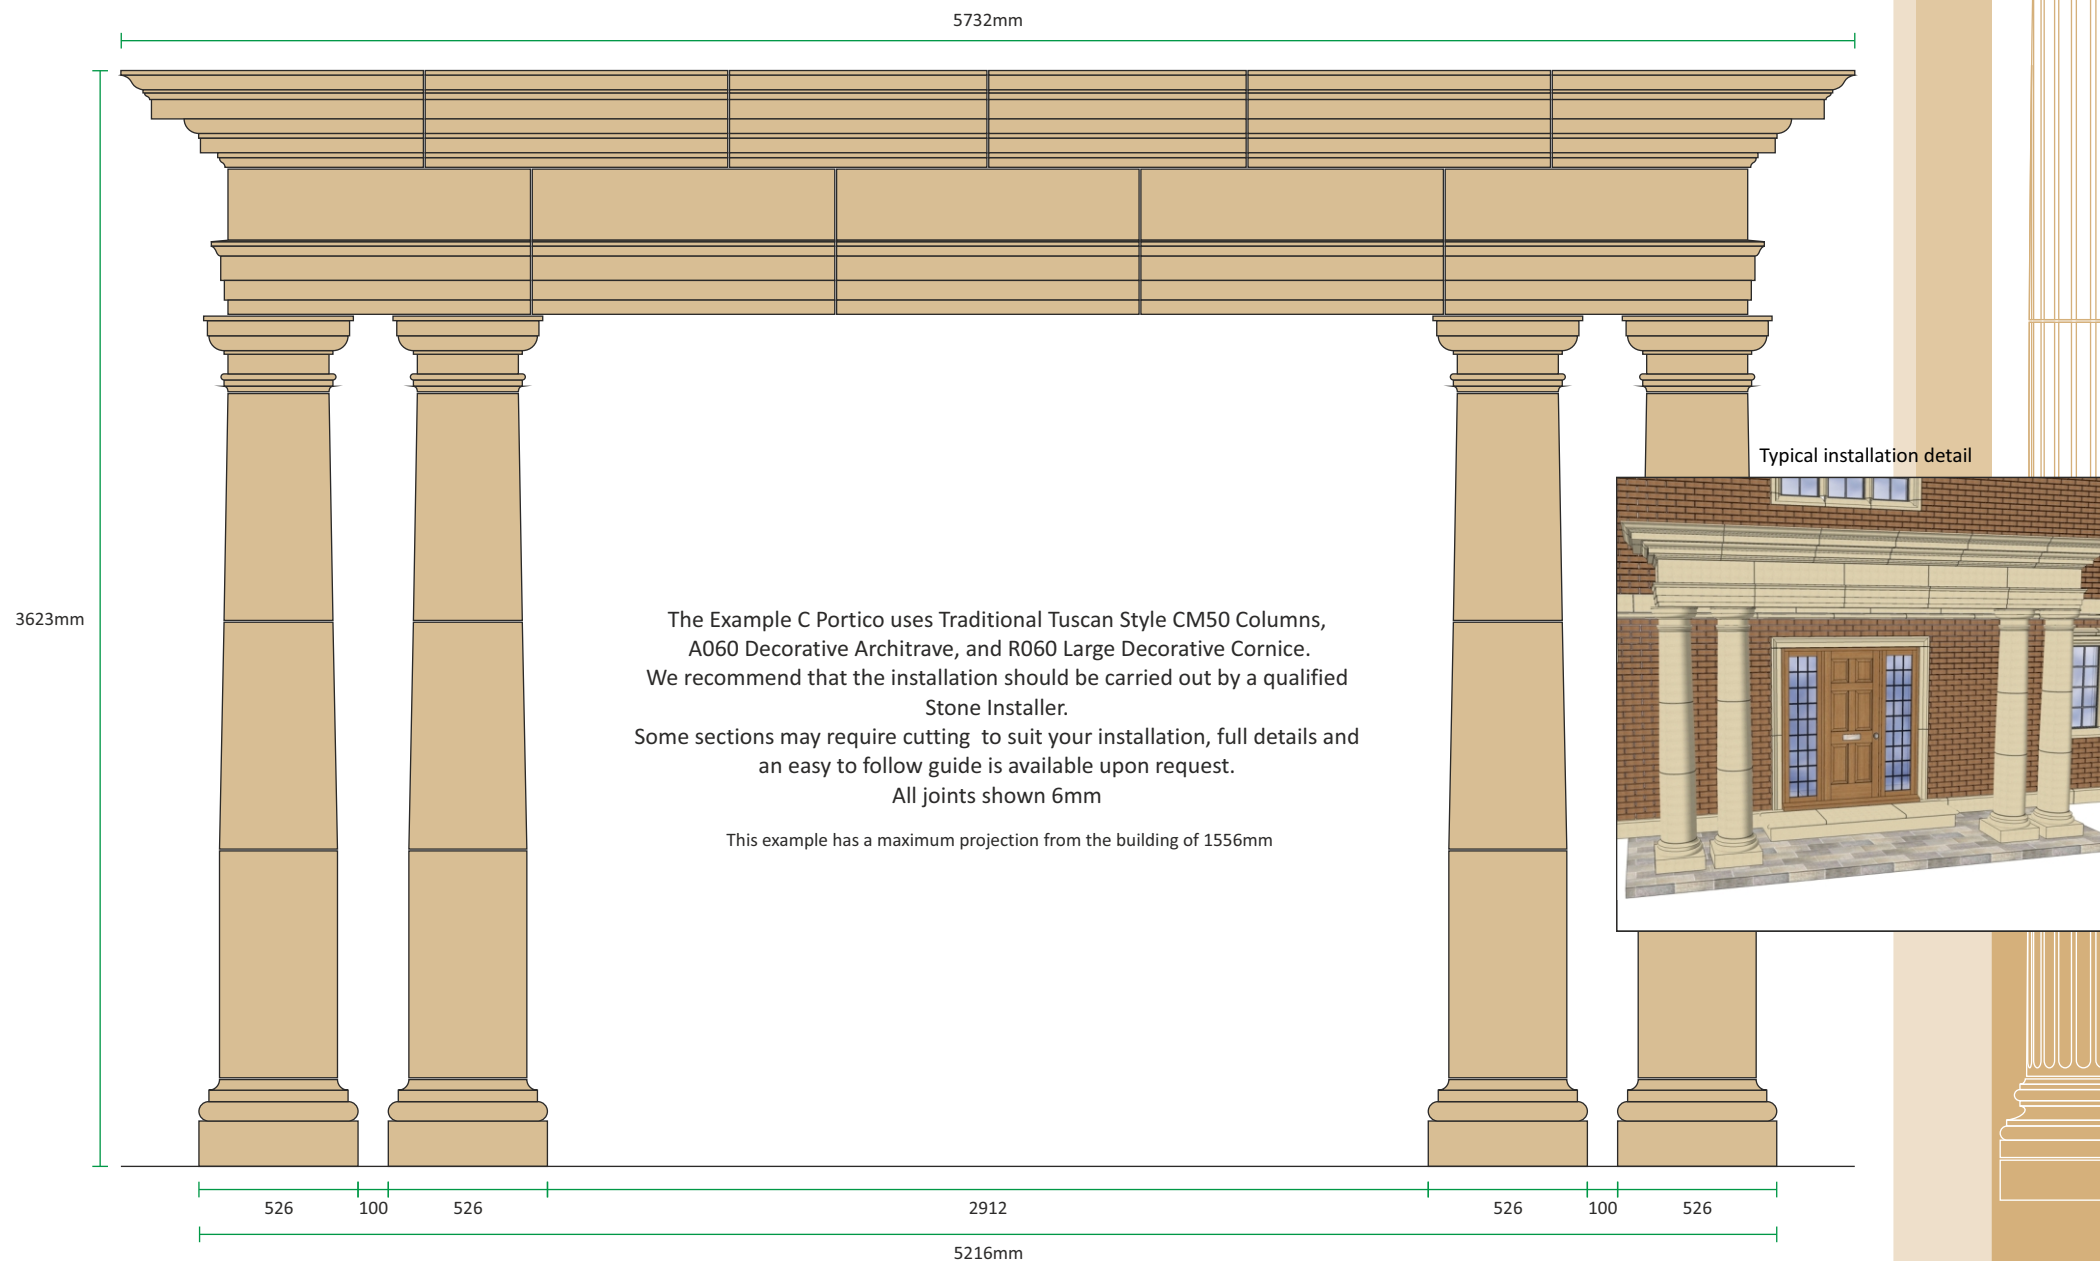

We recommend that the installation should be carried out by a competent builder or qualified Stone Installer.

Some sections may require cutting to suit your installation, full details and an easy to follow guide is available upon request.

All joints shown 6mm

Example C Portico

Our largest example portico can create a grand entrance to any property.

Architrave

A key feature of any portico, architraves create the impressive facade whilst providing the facility for your chosen fixing method.

Typical installation detail

B100 Blocking Course

A010-200 Architrave

A010-300 Architrave

A030 Architrave

A020 Architrave

A060 Architrave

Our Architraves are available in straight sections or handed returns.
All cast include 'cast in' stainless steel fixing loops.
Bespoke fixings to suit your project can be cast in.
Please call a member of our technical staff to discuss your requirements.

Cornices

Our range of classically inspired cornices can be used for porticos, parapets, or to create a decorative addition to a wall.

R016 Cornice

R020 Cornice

R010 Cornice

R015 Cornice

R060 Cornice

R050 Cornice

Typical installation detail

Our Architraves are available in straight sections or handed returns.
The R020, R010, and R060 Cornice include 'Cast in' Sockets to receive lifting eyes.
Bespoke fixings to suit your project can be cast in.
Please call a member of our technical staff to discuss your requirements.

Tuscan Columns CM20, CM30, and CM40

Whether building a Portico, or creating a colonnade we have a range of columns to suit any installation.

Our CM20, CM30, and CM40 Columns are available in a number of forms.

- Full Column
A Tuscan column with classically correct entasis.
- Split vertically
Perfect for installing around existing structures, steelwork etc.
- Half Column (Classically Half)
A classically correct three quarter column suitable for completing a portico where a column is required against the building.
- Half Column (Exact Half)
A half column where space is at a premium or suitable for a door surround.
- Pilaster
A square in plan slim pilaster.

All our columns can have their overall height increased with a riser, or decreased with a slight modification.

Typical installation detail

All our columns are supplied non-structural.

A 105mm diameter core can accommodate sufficient reinforcement to create a structural element.
This core should be lined with a suitable foam membrane prior to any backfilling.

Tuscan Columns CM50 and CM90

Our Larger Tuscan columns are suitable for grand installations and larger porticos.

Typical installation detail

Our CM50, CM90 Columns are available as;

- Full Column
- Split vertically
- Half Column (Classically Half)
- Half Column (Exact Half)

The CM50 and CM90 are available as Pilasters

Columns C001, T150,

Ornamental C001 and T150 columns.

Our C001 and the T150 are suitable for ornamental purposes only.
An optional core of 25mm can be cast in to order, this enables the column to be reinforced with Stainless Steel bar and resin fixed on site.

All our columns can have their overall height increased with a riser, our decreased with a slight modification. If you require any further information, please call 01258 472685 and ask to speak to a member of our technical department

Glossary and FAQ's

To help you and answer a few of your questions, we have compiled this handy list of commonly used terms and questions.

Glossary

Cill - A horizontal piece forming the bottom frame of a window or door opening.

Stool - Part of the cill that is built into the brick work. This enables the brickwork to be built on top of the cill and continue in standard bond.

Weatherbar - A stainless steel or brass bar linking the cill to the window frame forming a waterproof barrier.

Head - A term that applied to the construction that comprises the entire lintel of a door or window.

Bearing - The area of the head supported by the brickwork below.

Chamfer - A bevelled edge.

Keystone - The central, topmost stone of an arch or head.

Gable Vent - A triangular or rectangular ventilation opening found in a gable wall.

Quoin - A stone or block reinforcing for accenting the corners of a building.

Plinth - A continuous course of stones supporting a wall.

String Course - A horizontal band or moulding set in the face of a building as a design element.

Portico - A large porch usually with a pediment roof supported by classical columns or pillars.

Column - A slender, upright structure, usually a supporting member in a building.

Colonnade - A row of columns forming an element of an architectural composition.

Architrave - Originally a simple, flat, structural lintel spanning an opening in a wall, it is the lowest part of the classical entablature.

Corbel - A projecting wall member used as a support for some elements of the superstructure.

Cornice - Decorative projection along top of wall.

Corinthian column - In classical architecture, a column decorated at the top with curlicues, scrolls and other lavish ornamentation.

Tuscan - A classical order similar to Roman Doric but having columns with an unfluted shaft and a simplified base, capital, and entablature.

Ionic - The type of Greek column characterised by scroll-like decorations.

Fluted - Having flutes or grooves.

FAQ

Can you cut the Stone?

Our stone cuts and carves just as true sandstone. A consistent texture throughout ensures that our product cuts and carves smoothly.

Can the columns be used structurally?

The majority of our columns incorporate a hollow core which can be used either to be filled with a reinforced concrete column, or as a casement to a structural steel support.

Are the Cills and Heads available for bespoke opening sizes?

All our Heads and Cills are available at bespoke sizes, either as a single section up to 1200mm or in multiple sections. Please call our technical department to discuss your requirements.

Is the stone frostproof?

All our stone products are frost proof and are unaffected in normal conditions if installed correctly.

How does the stone age?

The stone ages in a similar way to true stone, this can be encouraged or slowed by using a number of readily available products after installation.

How do we fix the stone?

There are a range of fixings specially designed for cast stone, if required; we can cast in fixings subject to your specification.

Are there installation guides?

Each of our products has a guide available. These are available from our technical department.

What colours are available?

The Cranborne Stone range of products are available in our six regional colours Portland White, Cotswold, Bath Yellow, Yorkstone, Devon Red and Shaftesbury Green.

Bespoke and colour matching is available as a special order.

Do I need an account to order with you?

We supply both the trade and private customers alike, you do not need an account with us to place an order. We do however request a deposit at the time of order.

Is Pointing mix supplied?

Where required, we supply sufficient colour matched aggregate free of charge. We recommend that this is mixed at a ratio of 4:1 with Portland White Cement. Pointing instructions are available upon request.

Bespoke Projects

If you have a project that requires bespoke features, Cranborne Stone can help.

Bespoke Projects

At Cranborne Stone we understand that some properties are individual and as so, they require bespoke designs.

We have over 30 years of experience supplying the most discerning of properties with bespoke features tailored to designers requirements. We offer an in house services from conception and design through to production and delivery with one to one support throughout the duration of your project.

We are able to attend site meetings, liaise between Architects and Clients, provide a fully specified quotation, working drawings for client approval, and a clear delivery program to suit your project.

As with any type of project, if we are consulted at design stage, we can save you time and money by suggesting solutions to any design issues before they arise.

Quality Standards

Cranborne Stone works to finer tolerances than the UKCSA standard for Mechanical strength. Regular testing by independent laboratories confirm our casts exceed British Standards for strength and capillary absorption. Standards laid down by the UK Cast Stone Association for accuracy and tolerance are also exceeded.

Our mix is semi-dry and homogenous which allows for better handling and cutting.

Casts conform to:

BS1217:1997 for strength

BS1217:1997 for capillary absorption

If you feel that you have a project that you would like us to help with, please feel free to contact us via email or telephone at the details below. We will be happy to assist you in any way that we can.

Using traditional techniques along side the latest design software, our designers can help you realise your ideas and guide you through the design process.
